

Steel City Schools Partnership – A Multi Academy Trust

Steel City Schools Partnership Vision and Aims

To provide a first class, innovative education for all.

Achieving Excellence

Sustaining Excellence

Sharing Excellence

SCSP places children at the centre of everything it does. Our drive and focus is on creating and ensuring that a first class, innovative education is provided for all. We aim to nurture, develop resilience and empower potential in every child, making it possible for them to lead healthy, productive and successful lives. We want our pupils to leave a positive mark on our and their world. They are our future.

Our vision is driven by the belief that every child matters, every child deserves the best and every child has the right to achieve. We want to inspire all our pupils to achieve their dreams and ambitions. In order to do this, high quality educational experiences, set within a real and relevant curriculum and context, will be an entitlement for every child with everyone working together to achieve this vision.

SCSP aims to constantly push the boundaries and perceptions of school leadership and governance structures by adopting outward facing attitudes and seeing challenges as new opportunities for future growth and development.

A Word from the Executive Principal, Nicola Shipman

As Executive Principal of Steel City Schools Partnership, I welcome and look forward to working with you whether as a pupil, a parent, a member of staff, an educator or leader of learning or as an interested visitor to our Trust. At our recent INSET day I challenged all 200 staff to consider what it means to be part of SCSP and this is just one of many views we have.

What is Steel City Schools Partnership in any case?

It's not just the school or the grown-ups, not the timetables and targets, or just the planning and percentages.

It's about relationships; friendships and family for pupils, parents and staff, a feeling of belonging, knowing that you are in a safe, secure place to develop and realise individual goals.

Somewhere that you can be a part of a team, while being valued as an individual.

Welcome to Steel City Schools Partnership
